J Trust Royal Bank

Intern – Web Application Developer

Role Location: Phnom Penh, Cambodia
Role Type: 6 months Internship, Full-time

We are looking for a motivated Web Application Developer Intern to join our Digital Development team. As an Intern - Web Application Developer, you will be responsible for assisting in the development, testing, and maintenance of web applications that support various banking services. You will gain valuable experience working with modern web technologies and banking systems while being mentored by senior developers and line manager.

Key Accountabilities

- Communicate with the users to understand requirements.
- Work with team members or line manage to analyze technical requirements.
- Collaborate with other developers, back-end and front-end developers and designers through the lifecycle of the app.
- Design, develop and maintain web applications.
- Identify, manage and resolve issues or bug fixes in a timely manner.
- Maintain release note, change log, and read me for new and updated software.
- Learn and adhere to security compliance and data protection standards in banking applications.

About You

To be successful in this role, you should ideally have:

- Currently pursuing or recently completed a Bachelor's degree in Computer Science, Software
- Engineering, or related field
- Basic knowledge of C#, ASP.NET Core, PostgreSQL, and SQL Server
- Familiarity with HTML, CSS, JavaScript, and frontend
- Understanding of CI/CD, Docker, Jira, GitHub, AWS , and API development (optional but a plus)
- Good problem-solving skills and willingness to learn
- Ability to work independently and as part of a team
